ClubOS – Tear Sheet

A 21st-Century, AI-First Platform for Community & Membership Organizations

ClubOS is a modern, modular, AI-augmented system for managing membership organizations, events, communications, committees, and digital assets. It fixes administrative pain points of legacy systems like Wild Apricot while keeping excellent end-user experience.

Core Features:
- Membership & Identity with rich history
- Governance & Leadership with role terms
- Events & Workflows including custom forms
- Communication & Routing
- Media & Photos system with gadgets
- Gadget-based architecture
- My Club personal dashboard
- AI-first design
